

Professional Development

My goal for the professional development task is to create a personal website that consists of my curriculum vitae and projects. I chose this task not only to solidify my HTML and CSS skills but also have a medium to display my work and have a link to share when looking for future employment. I will consider this task a success if I have a shareable link to a fully functional website that displays my CV and projects. I have some HTML and CSS knowledge but I will use the following resources to ensure that I don't get stuck: <http://jmcglone.com/guides/github-pages/> and <https://medium.com/@svinkle/publish-and-share-your-own-website-for-free-with-github-2eff049a1cb5>. I will use Git-Hub to host my website.

This is the timeline I wish to follow:

Date	Things to do
Week 1 (1 st – 7 th Feb)	<ul style="list-style-type: none">• Understand how I can use my Git-Hub to host the website• Plan a sketch of how I want my website to look• Go through some available CSS styling and pick a design I like
Week 2 (8 th – 15 th Feb)	<ul style="list-style-type: none">• Create short write ups for my projects• Finalise the content for my CV
Week 3 (16 th – 23 rd Feb)	<ul style="list-style-type: none">• Start creating the website using HTML
Week 4 (23 rd – 28 th Feb)	<ul style="list-style-type: none">• Finish up the website
Week 5 (1 st – 7 th Mar)	<ul style="list-style-type: none">• Buffer week to cover up tasks from previous weeks
Week 6 (8 th – 15 th Mar)	<ul style="list-style-type: none">• Send the website to friends and mentors for feedback
Week 3 (16 th – 23 rd Mar)	<ul style="list-style-type: none">• Implement the feedback received and submit the final result!

I really wish this project ends up being a showcase for all my projects and thoughts. Ultimately, I hope I can use this website as a way for future employers and or people on the internet to get to know about me.
